Matched PSF band controls · identical labels and objects
Fixed forest calibration uses cal only; original QRF partition training differs
Held-out development class information
Log score gain over no-color prior (nats)
Frozen partitions, common labels
Fixed classification forest
Calibrated probabilities; lower is better
Multiclass Brier score
Full color covariance; bounded neighbor search
Local same-class reference mass
Dwarf
Giant reference
Other stellar
Shared band noise and common target routes
Template-conditional log score gain
Original bright templates
Same templates + target noise
